MEMORANDUM

TO: 116/Director for Aeronautics

FROM: 118/Director for Structures

SUBJECT: Transfer of Responsibility for the Low Speed, Quiet
Mini-Tunnel, Building 1229

The Low Speed, Quiet Mini-Tunnel (LSQMT) located in Building 1229, has been the responsibility of the ANRD of this directorate. However, ANRD will complete its planned experiments in the LSQMT by about June 1, 1979, and that facility will become surplus to our needs.

The operational history of the LSQMT indicates its principal user has been the Fluid Mechanics Branch of the High Speed Aerodynamics Division. Therefore, if the Aeronautics Directorate has a continuing need for the LSQMT, I request that you assume responsibility for it when ANRD finishes their experiments in it in the summer of 1979.
